

GLOBAL MANUFACTURING & DISTRIBUTION

WELCOME

An Introduction to the Perry Group

The Perry Group was founded in 1925 as a leading European manufacturer of Ironmongery and Gate Hardware. 96 years later, UKANDIN was formed in 2021 in Delhi, India. It is now the Perry Group's purpose-built manufacturing facility, established to take full control of the supply chain.

The facility has enabled the group to have direct control of quality and production of all products, as well as extensively develop new ranges and produce custom order requirements for customers within the UK, Europe and across the world.

WHAT WE DO

UKANDIN are a Manufacturing Export Company based in Greater Noida, India with over 50,000 sq feet of warehousing and manufacturing capacity, focusing on ironmongery and agricultural hardware products. Our additional European Group Manufacturing and Distribution Facility offers a further 140,000 sq feet in the United Kingdom.

Offering competitive pricing with market leading quality and service, our extensive toolroom enables us to develop bespoke products, supplying to customers exact requirements - including those outside of our traditional agricultural industries.

MOST COMMON FINISHES

Key to Corrosion resistance

Galvanised: (GV)

Galvanising is a rough grey finish commonly known as Hot Dipped or Hot Spelter Galvanised. The galvanising process creates a protective zinc layer, offering exceptional corrosion resistance and longevity.

UKANDIN galvanising is industry leading with up to 60% thicker microns to other leading brands, making it the superior finish on the UK market.

Corrosion Resistance: Excellent corrosion resistance, making it ideal for rugged outdoor conditions.

Self Colour: (SC)

Self Colour means the product is uncoated and has a natural, raw appearance. This finish is often used to paint over the product.

Corrosion Resistance: No corrosion resistance; best suited for dry indoor environments.

Black Powder Coated (BK)

Black Powder Coated finishes are suited for both indoor and outdoor use. Providing a sleek, matte black appearance. This finish offers standard durability and resistance to weathering, making it a popular choice for gates, fences, and more.

Corrosion Resistance: Moderate corrosion resistance, suitable for general use, but not ideal for harsh outdoor conditions.

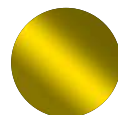

Zinc Plated: (ZP)

Zinc Plated hardware is versatile and suitable for a wide range of applications as it provides a moderate protective layer against corrosion, enhancing the longevity of the item.

Corrosion Resistance: Moderate corrosion resistance; suitable for general use, but not ideal for harsh outdoor conditions.

Yellow Passivated: (YP)

Produced using the same process as silver coloured zinc plating but with a yellow tint. It is versatile and suitable for a wide range of applications as it provides a protective layer against corrosion, enhancing the longevity of the item.

Corrosion Resistance: Moderate corrosion resistance; suitable for general use, but not ideal for harsh outdoor conditions.

Stainless Steel: (SS)

Stainless Steel is a premium and attractive silver finish, suitable for a wide variety of outdoor applications, where extreme weather resistance is needed.

Corrosion Resistance: Excellent corrosion resistance, suitable for all environments, including marine and corrosive settings.

Pre-Galvanised: (PG)

General Use: Pre-Galvanised items are used in construction and structural applications, offering corrosion protection.

Corrosion Resistance: Good corrosion resistance, suitable for many outdoor uses.

No.2153

Metal Fieldgates with Box End - 7 Rail

Constructed with precision from robust, galvanised steel, these gates offer unparalleled strength and resilience. The sleek design and sturdy structure ensure long-lasting performance.

- Top and bottom rails - 43mm tube
- Intermediate rails - 29mm tube
- Fastens using a Sprung Slide Bolt (sold separately, No.178, see page 9)
- Gate hangs on Adjustable gate eyes (sold separately, No.165, see page 19)
- 50mm x 50mm SHS (Square Hollow Section) sleeved hanging stile

No.113

Adjustable Bands & Hooks on Plates

Adjustable band and hook for accurate placement of gates.

- A slightly lighter construction than our No.112, with a slightly shorter eye bolt
- Galvanised for maximum protection
- Black powder coating for stylish looks
- Ideal for driveway and entrance gates
- Allows adjustment whilst fitting or at a later stage
- Commonly used in conjunction with automated closing gate systems

BESPOKE LASER CUTTING

They protect the post base from insects, fungal and water damage, and allow for the post to be removed or replaced with far less effort than if they were concreted in directly.

All our Fence Post supports are made from heavy gauge durable steel and available in powder coated brown or high-grade galvanising.

No.4705

Bolt Grip Fence Post Support to Bolt Down

A square timber post support that attaches to the ground with concrete bolts. To be used on surfaces such as concrete, paving, brick or wood and protects the post base from insects, fungal and water.

The twin bolt fixing system is adjusted to hold the post firmly.

Bolt down using M10 (50mm) or M12 (75mm+) Shield Anchors (6027/PP) or Concrete Bolts.

No.4706

Flush Fit Bolt Grip Fence Post Support to Bolt Down

A post support that works in the same way as a No. 4705 Bolt Down support, however this has a narrow oblong plate instead of the traditional square base that allows the support to be located close to a wall or structure.

Twin bolt fixing system is adjusted to hold the post firmly.

Bolt down using M12 Shield Anchors (6027/PP) or Concrete Bolts.

Steel Fencing System

Steel Post Fencing System

The UKANDIN Steel Post Fencing System has been designed as a simple, cost effective alternative to wooden fencing systems. The system is compatible with C8, HT8 and FX8 stockfence, as well as having 2 hole positions for Barbed Wire.

- 25 Year minimum life expectancy
- Fully configurable to suit customer requirements
- Unique, simple to install design
- CUSTOMISE ANY PART OF THE SYSTEM TO SUIT YOUR CUSTOMER MARKET

Steel Support Struts

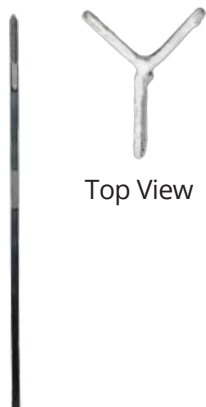

The struts easily fit into the holes without the need for tools. These can be positioned to 3 different heights, depending on your choice of installation fence height.

Steel Base Plates

The Struts of your Fencing System need support to stay in place. The UKANDIN Fencing System offers a dual purpose base plate with a drive-in security pin:

- Suitable for Soft and Hard Ground
- Drive-in Security Pin included

Top View

No.4725 Steel Intermediate Posts

Intermediate Posts are usually fitted 2m apart. Thanks to the Y Shaped Profile of these posts, there is no need to dig holes or set concrete bases – simply drive them into the ground. Each post has a designed plate installed on the bottom, ensuring the post will not up from the ground once installed.

- Y Shaped Profile offers maximum strength
- Easy to install, simple, drive in solution
- Unique plate prevents the post being pulled out

No.4726

Steel Fence Post Clips

These clips are used to join the mesh fencing to the UKANDIN Steel Post Fencing System. Standard Fence Clip Pliers can be used, or for best results, use the UKANDIN Fencing System Clip Pliers.

No.2162

Fencing Pliers

Installation becomes easy when you use the right tools. These Pliers have been uniquely designed to work effortlessly with the UKANDIN Fencing System Post Clips.

- Increase installation speed by up to 50%

Salt Spray Tested

Our products have been "Salt spray tested" to over 700 hours. Far greater than given to other manufacturers' more expensive products.

Therefore, our Old Hill range has improved durability and life.

Creation

The manufacturing process of our superb range of Old Hill Ironworks hand-finished accessories combines the highest quality malleable cast iron, together with the increased endurance of a stainless steel inner mechanism.

Our malleable cast iron has the best shock resistance and is ductile, with mechanical properties of elasticity and impact strength, making it the ideal material for use in this high quality range.

The powder coating process creates a premium decorative antique black finish which will give your products an extended life.

Old Hill Ironworks Product Features & Finishes

Salt Spray Tested

Our products have been "**Salt spray tested**" to over 700 hours. Far greater than given to other manufacturers' more expensive products. Therefore, our Old Hill range has improved durability and life.

Flat and raised head screws are black passivated stainless steel, providing corrosion resistance and durability.

Fixings

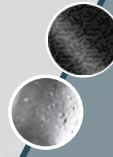

Mechanism

Stainless steel mechanism, washers and cams offer increased durability and endurance, allowing for a softer and more progressive lever operation.

UV colour fast black powder coat reduces the likelihood of fading and better resists oxidation.

All coatings are from recognised global brands no recycled material is used.

Outer Coating

Inner Coating

A **protective zinc rich powder coat finish** is applied under the decorative finish to provide further durability.

Cast base metal

Extremely durable high quality **Malleable Iron** base metal shot blasted before protective coating are applied.

POWDER COATING

Outer Coating

UV colour fast black powder coat reduces the likelihood of fading and better resists oxidation. All coatings are from recognised global brands no recycled material is used.

Inner Coating

A protective zinc rich **powder coat finish** is applied under the decorative finish to provide further durability.
